

The Bill Shrader Cartoons

Compiled by Don Marske and many friends of Bill ..

The Alumni History committee is excited to bring a sample of the many cartoons of Bill Shrader to the website. Bill, a talented electrical engineer, and project manager in the Corvallis office from 1966 to 1992, is also an incredibly talented cartoonist who enjoyed capturing the "special" features of our early wastewater treatment business in a humorous light. In a recent conversation with Bill, he noted that our business provided a never-ending source of cartoon material. We laughed at his grit hopper; pig launcher; and, of course, the pig catcher. He said he could not have done it without the people who appreciated and welcomed the humor. "It was a special time with a special group of people."

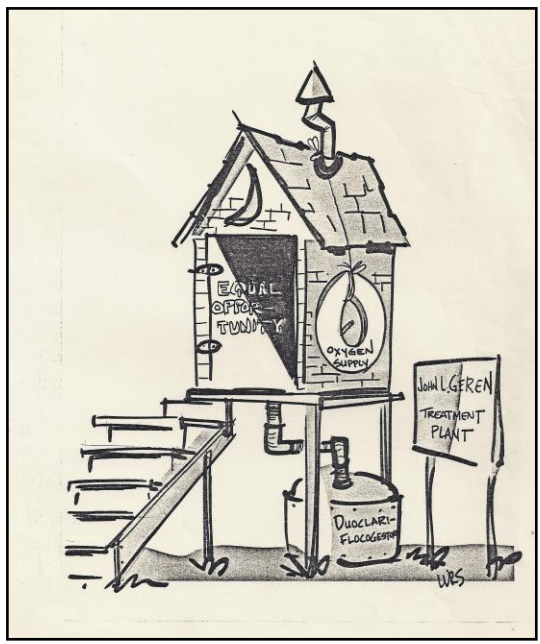

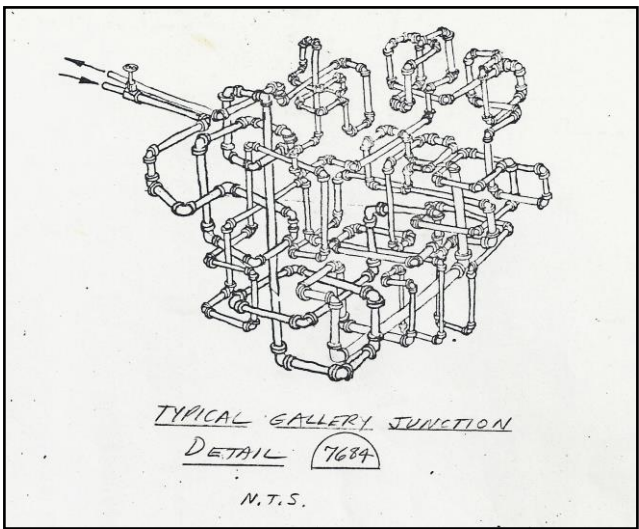

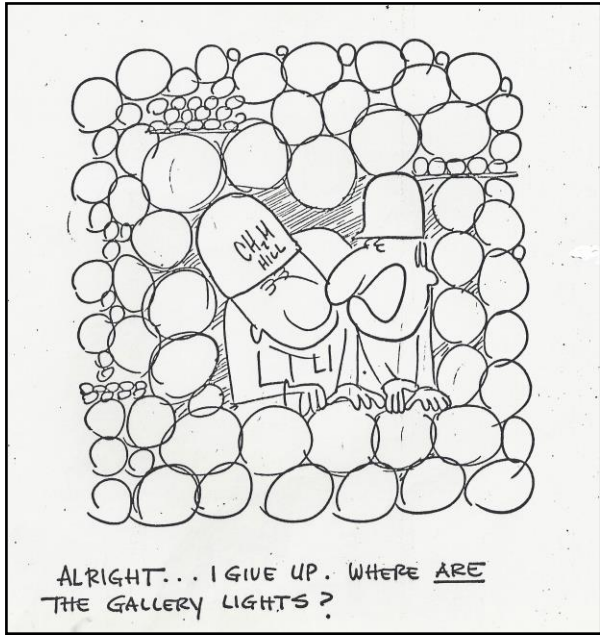

His sketches spanned a wide range of subjects including design, operation, project management and project managers, and his friends and colleagues. He also helped many of us with our brochures and presentations. Following is a sample of his work.

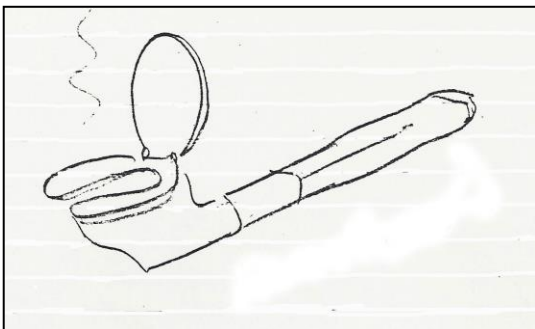

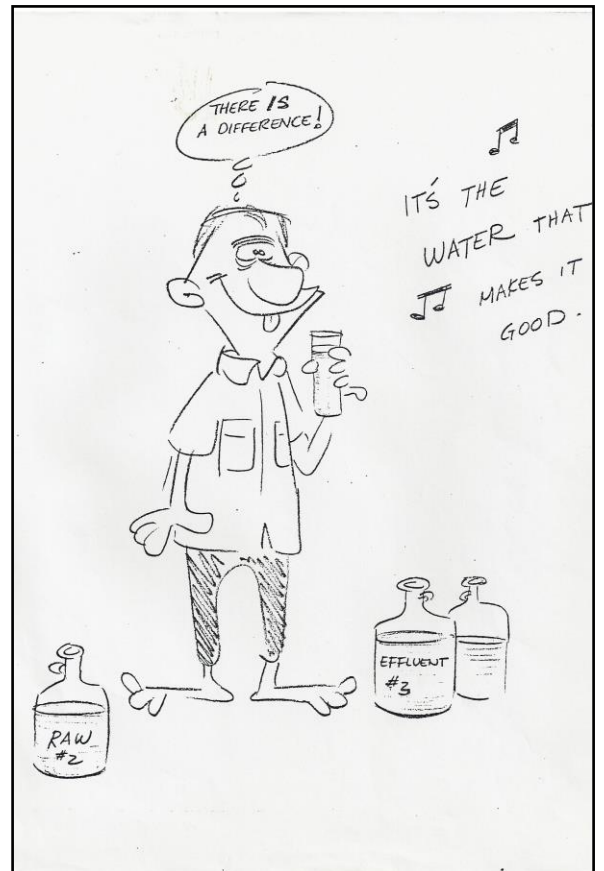

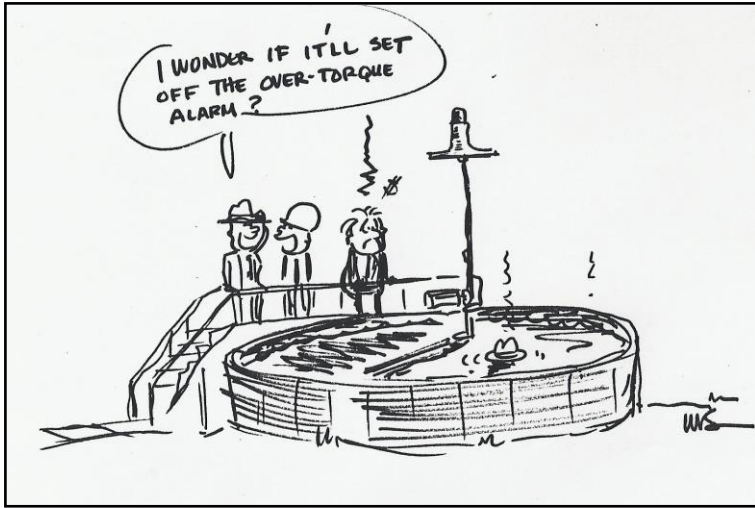

On wastewater treatment design and operation ...

Bill clearly enjoyed the pipe cleaning tools of our business where, for those not familiar, a "pig" is installed and pulled through a pipe to clean the interior of a pipe. See attached link for more ..

SEMINAR

PACIFIC CASCADE
SECTION

APRIL MEETING NOTICE

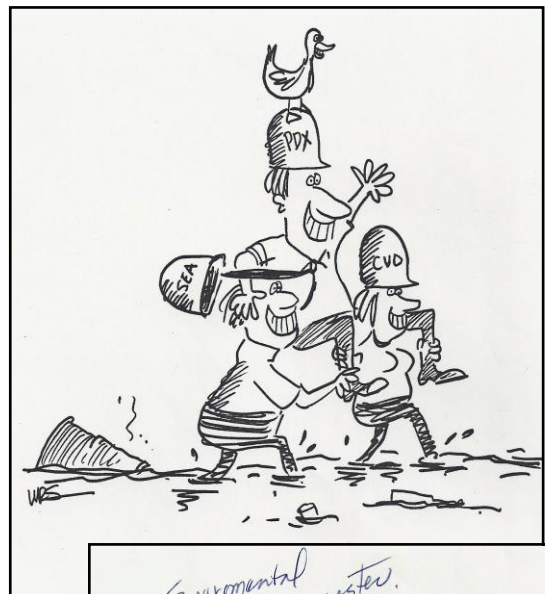

WHEN: Thursday, April 29, 1976

WHERE: International Dunes Restaurant
3350 Gateway
Springfield, Oregon
(I-5 at Belt Line)

TIME: 6:30 P.M. Social
7:15 P.M. Dinner (\$4.85 w/gratuity)
8:15 P.M. Meeting (business, announcements)
8:30 P.M. Program

PROGRAM: Weyerhaeuser Plant Tour (Springfield)

FOR INFORMATION CONTACT: Basil Adams - 746-2511

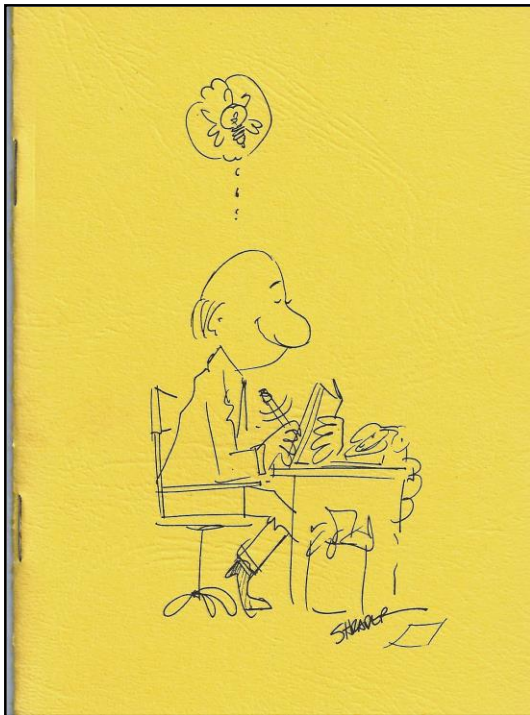

for Environmental
clean-up poster.
CH2M Hill's offices
in Covallis, Portland
and Seattle. *WBS* 7/91

Bill's most enduring and widely recognized sketch appears on *The Little Yellow Book*.

Bill shared that Jim Howland asked him to do the cartoons for the book. Bill told him, "Gee, I'm just too busy right now. Check with Bob Wehnert." (Can you imagine telling Jim you're too busy?!)

A little while later, Jim came back with Ann Adams at his side and asked Bill if he would do the cover. Bill again deferred, "Gee, I'm just about to go to Portland. I can't do it until I get back." Jim said, "Well, can you do it right now?" And Bill did. Check the cover. Bill did that classic cover on the spot with Jim and Ann Adams looking over his shoulder!

MEMORANDUM

From: Jim Howland
Date: 1/27/82

To: Bill Shroder / CVO
(OFFICE) (OFF)

Re: Sketch
Project No. 0000H

Bill:-

The sketch is great. Thank you so very much for taking the time and effort from your overloaded schedule to do it!

Just something about it that perks a pleasant response - in me for sure + I think in others

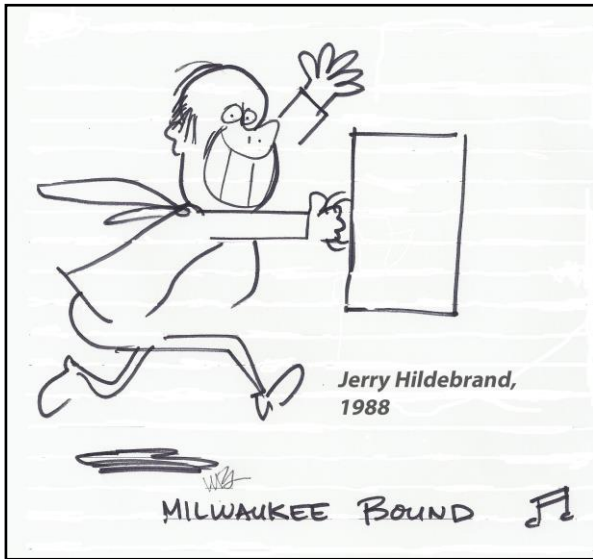

Thanks again.

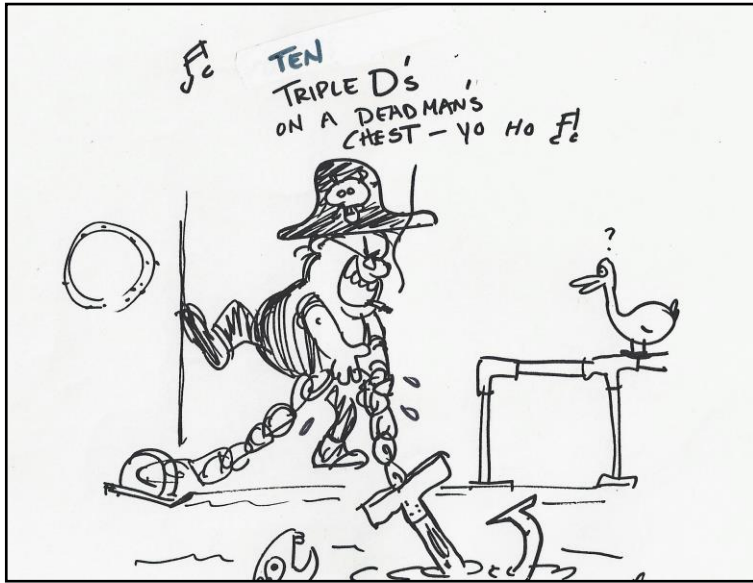

Jim Howland

Couldn't reach you on the phone so take this route to tell you

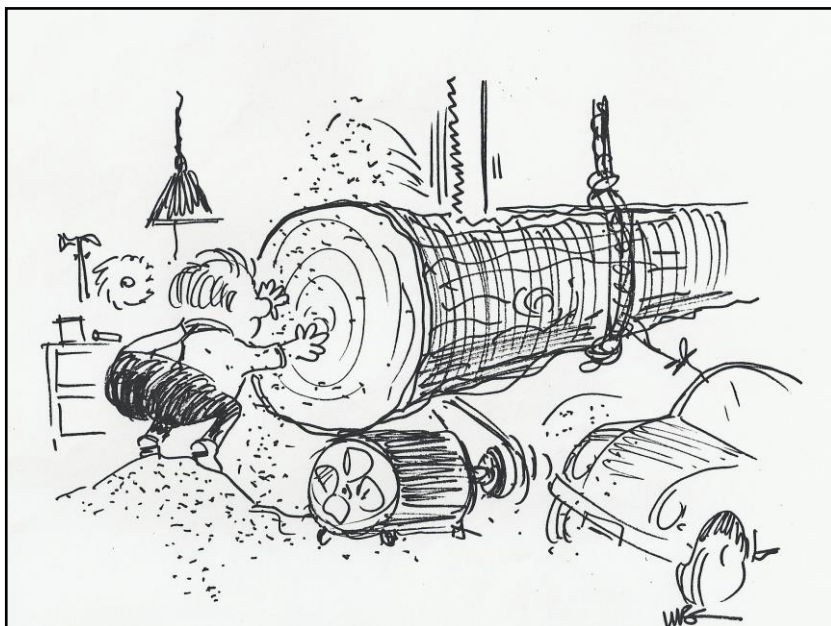

JH

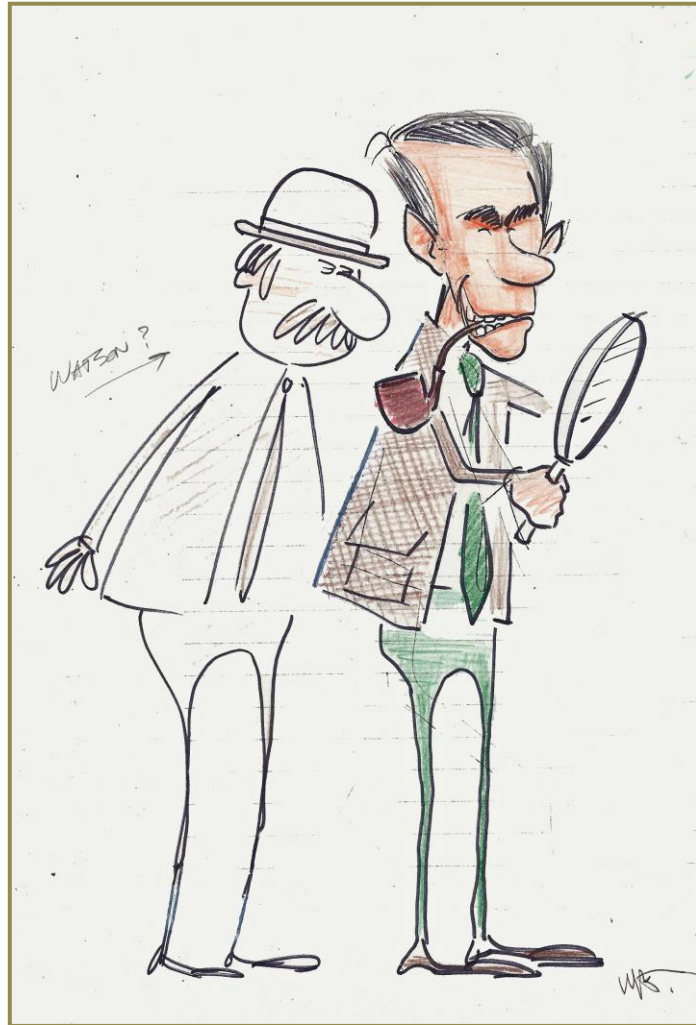

On friends and colleagues ...

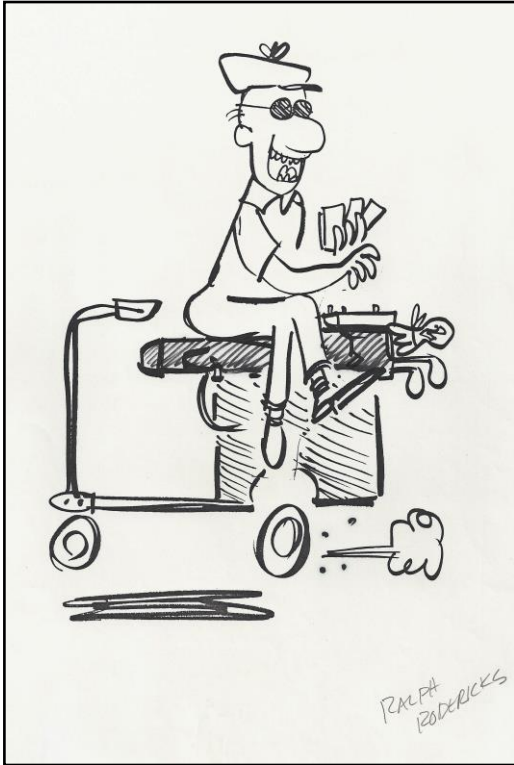

Gene Suhr was a close friend of Bill and stayed in touch with his woodworking and sailing skills.

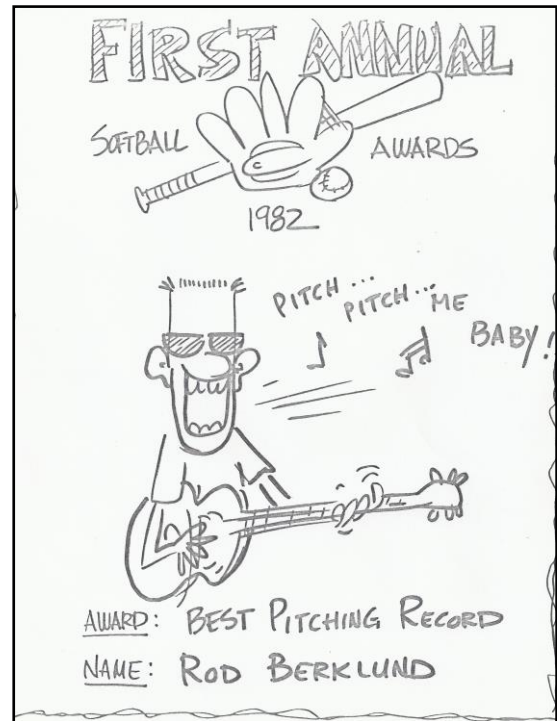

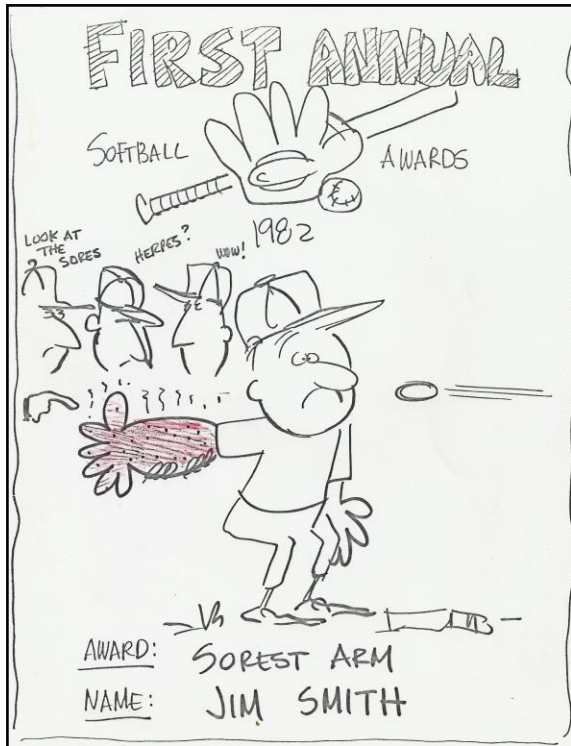

Bill captured our very own Sherlock Holmes ... Austin Evanson

On some of our original partners ...

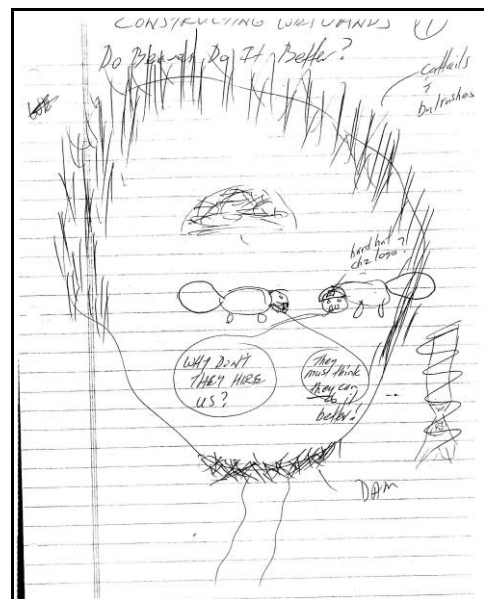

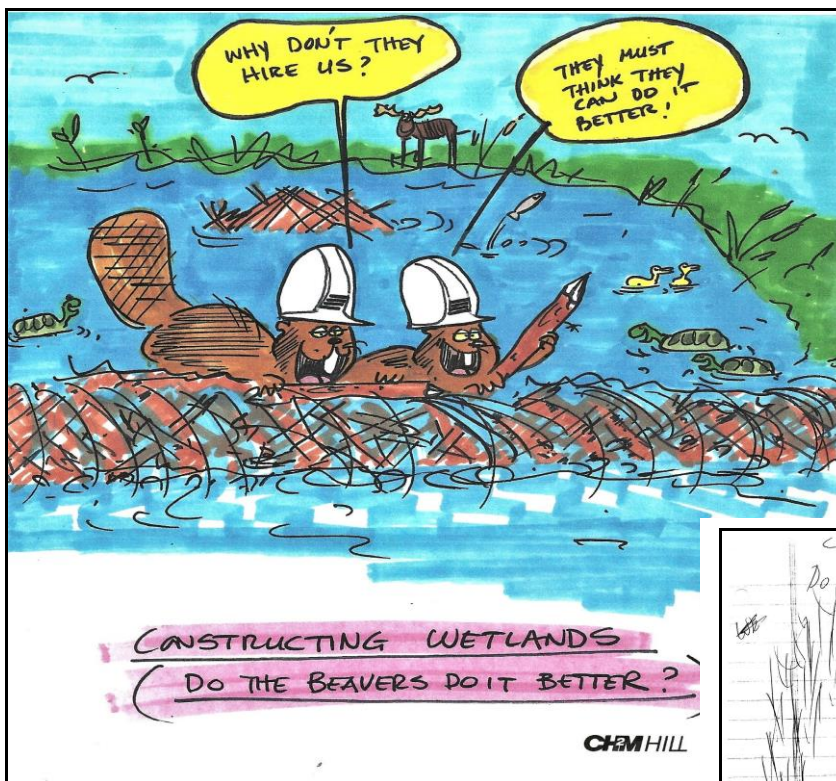

The First Annual Softball Tournament Awards ...

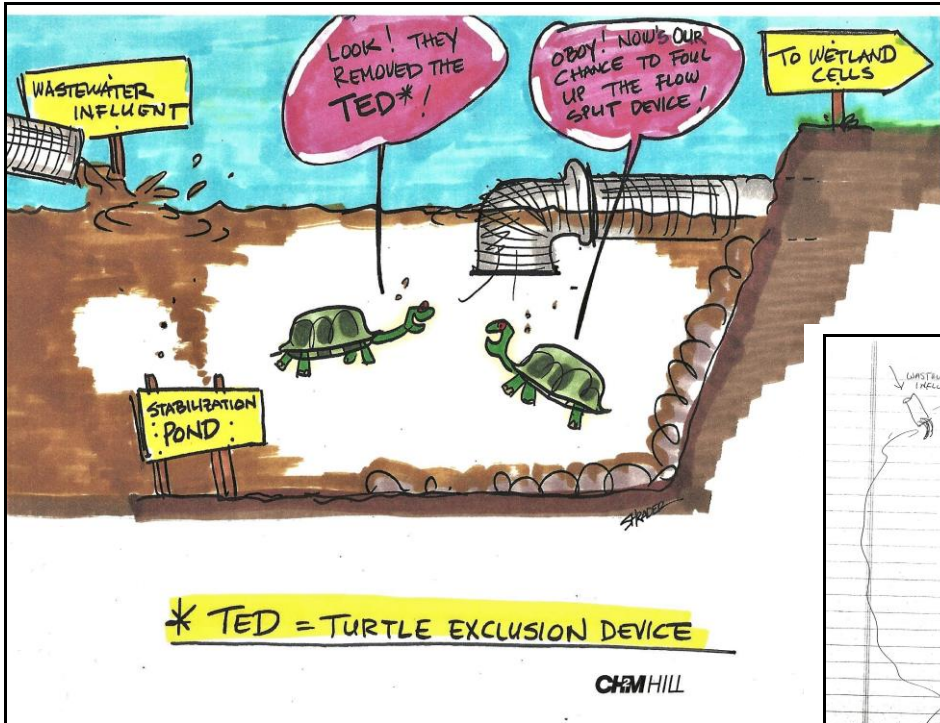

Editor's Note: We are sad to report that Bill passed away at his home in Alsea, Oregon, on May 3, 2017. He was 81.

On helping colleagues with public presentations ...

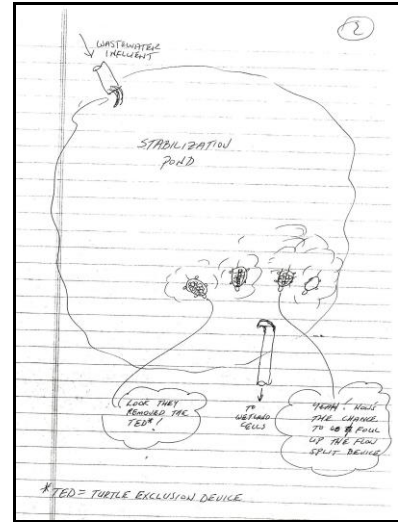

Dennis Sandretto, responding to a call for papers for the 1991 WPCF conference in Toronto, reached out to Bill to put some spice in his Fort Deposit Alabama wetlands project presentation. The project had some unique features that lent itself to some humorous nature vs engineering twists. Following is how Bill converted Dennis's drafts to a cartoon. The paper was well received.
