

Paragon Structural Design, Inc. Building integrity at every level

Paragon Structural Design, Inc., a subsidiary of CH2M HILL, provides structural engineering services to the architectural and construction industries. Projects include the Sandra Day O'Connor U.S. Courthouse and the current design of a hangar with a 300-foot roof span for the world's second largest aircraft, the C-5A.

Do you have a project with structural needs? Check out Paragon's list of services:

- Feasibility Analysis
- Structural Design
- Existing Facility Renovation
- Structural Forensic Investigation
- Peer Review
- Long-span Design
- Tensile Structures
- High-rise Structural Systems
- Alternative Project Delivery Methods
- Fire-resistant Structures
- Seismic Analysis and Design
- Architectural Concrete and Metals Design
- Foundation Design
- Value Engineering
- Floor Vibration Analysis
- Sustainable Design
- Blast-resistant Physical Security Design
- Fast-track Construction Packages
