

Welcome BBS employees

CH2M HILL welcomed 75 employees from BBS Corporation into the CH2M HILL enterprise in October.

BBS is an Ohio-based engineering firm specializing in planning, design and

construction administration of water and wastewater treatment, distribution and collection systems. Since 1937, BBS has established a reputation of providing high-quality systems for its clients.

"With clients demanding more specialty technical expertise, this acquisition is a win-win for both companies," said Tom Searle, CH2M HILL's Water Business Group president. "BBS employees

will acquire tremendous career growth opportunities, while CH2M HILL will benefit from BBS' very talented workforce, its healthy client base and its strong engineering and technical reputation."

Through the acquisition, CH2M HILL is meeting strategies and expanding its reputation in Ohio. It also increases the firm's conveyance and wet weather treatment capacity in the region and better positions CH2M HILL

in Ohio's emerging design-build market. UN
