

Meeting today's manufacturing and environmental challenges

Got a special client need?

Aketon Technologies is a member of the CH2M HILL Family of Companies specializing in designing and manufacturing unique pollution control systems and custom process equipment.

Aketon offers:

- 15,000-square-foot facility where toxic, flammable, pyrophoric and poisonous gas can be safely stored for testing
- Outdoor and indoor prototype testing capabilities
- Chemical analysis and testing through CH2M HILL's Applied Sciences laboratory
- The latest 3D design and documentation technology
- Integrated procurement, billing and inventory management

For more information, contact:
Allen Wright or Rod Gravley at 541-758-1510
or see www.aketontechnologies.com

**Call Aketon today —
your client will be glad you did!**

"STANDARD" PRODUCT LINE

Blue Sky™

Liquid scrubbers including cloud chamber technology sized from 10 to 60,000 cfm

ThermoClean™

Thermal treatment systems sized from 10 to 100,000 cfm

TransChem™

A pulsed energy gas phase recombination system

eWatch™

An Internet-based remote process monitoring system

Clean-room systems and Automated air-monitoring systems
